## E-rate Survey - NPRM Data Collection

9/16/2013 4:14 PM

### Response filters:

Complete: 31 On, Partial: 1 Off, Excluded: 0 Off

Country: All, Region: All, City: All

Sources: All

### Question filters:

None

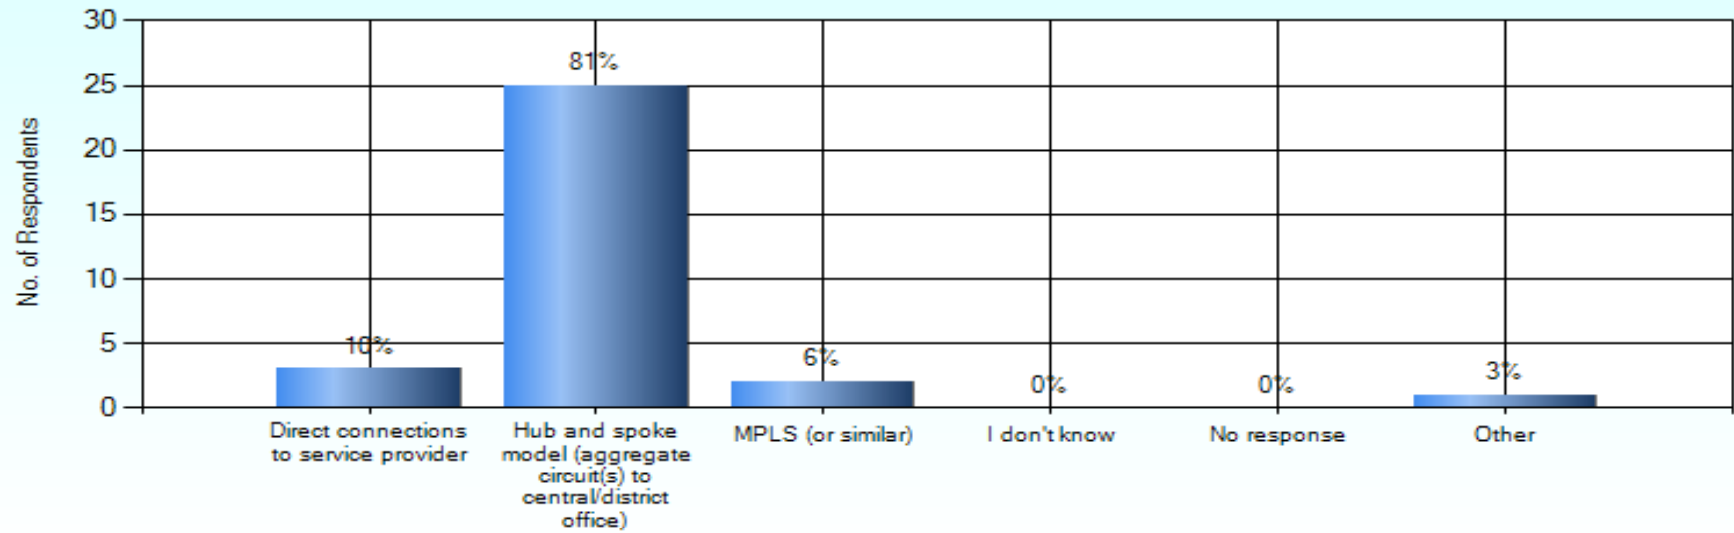

2. Do you support a permanent increase in the E-rate funding cap even if it results in an increase to a Universal Service Fund surcharge of \$0.40 to \$1.00 per month per line?

### 3. How do you connect to the Internet?

#### 4. What method/configuration do you use to interconnect your sites to the Internet?

5. At what speed does your entity connect to the Internet? (Per the question above, please consider your configuration model and 'do the math' if necessary)

6. What is your current average Internet bandwidth to each school or library location?  
(Again, please consider your configuration model and 'do the math' if necessary)

7. Based on the proposed 2015 standard of 1 Gbps of Internet per 1,000 students, how many additional Gbps of Internet bandwidth will you have to purchase or lease?

8. What is your current average bandwidth speed from the Internet to the classroom?

9. If, by 2015, you had to upgrade your local area network to 1 Gbps per 1,000 students and deliver it wirelessly to the classroom to meet the White House and FCC's stated goal, how much would it cost on average per school to implement the upgrades? - Please consider upgrades such as fiber runs, POE switches, MDFs, IDFs, robust access points and controllers, CAT 6 cabling to classroom or wireless drop, etc.

10. How do most of your students or patrons connect via your LAN to the Internet?

11. Would your entity be willing to forego E-rate discounts for some previously eligible services in exchange for a more stable and predictable Internal Connections funding model?

12. If you said "Yes" in the previous question, which currently eligible products and/or services would you be willing to forego E-rate discounts?

13. The FCC has proposed establishing separate Priority I and Priority II filing windows. Would you favor such an approach?

14. Would you support a change to the E-rate discount calculation methodology? If not, please select "No change". If so, which methodology would be most preferable to you?
